The city is building a new high school in the northeast of the city, in the neighborhood of the Terra Nova Campus. In the future, children from 1st to 10th grade will be taught there according to a special educational concept. In keeping with the demand of the times for diversity and modernity, this is also to be reflected in the school’s appearance. Thus, artistic work is to be realized in coordination and harmony with the architecture. There are several locations in the school building to choose from.

For this purpose, a two-stage, anonymous artistic competition will be held. In the first phase, artists and artist groups are invited to apply for participation in the competition. From the applications, a jury will select a maximum of ten artists* or artist groups to participate in the competition phase 2. Those selected will be asked to develop an artistic idea that can be implemented in accordance with the task. The best proposals will be awarded a prize. The first prize is to be implemented as part of the construction measures.
